[\[?\] Why are some boxes blank?](#)

Lead times are business build days - they do not include transit time.

If you need a faster lead time or larger quantity than what is displayed, please [contact us](#) so we can verify current manufacturing availability.

Tech Tips

Copper Thickness FAQ

The most common unit of measure for the copper thickness on a printed circuit board is ounces (oz). But how thick is that? It's the resulting thickness when 1 oz of copper is pressed flat and spread evenly over a one square foot area. This equals 1.37... [read more >](#)

Our Advantage

At PCB Universe we understand your technical requirements are evolving but your basic needs will always remain the same; consistently high quality: dependable lead times, low cost and responsive service. These are the cornerstones of our business philosophy and we are committed to the continuous improvement of our services to our customers. [read more >](#)
